Post Operative Instructions for Gingivectomy

Use an over the counter pain medication such as Ibuprofen (Advil, Motrin), appropriate for your child’s age and weight, as needed.

Performing warm salt water rinses after the procedure at least once a day for 5 days is recommended.

Brush teeth as normal, avoiding surgical area. 24 hours after the procedure, begin light brushing of the surgical area with each tooth brushing.

If you have any question, please contact the office (407-628-2286).

We will see you in 2 weeks for a post operative check.
